

# CHARGING POLE eMC3

## CONTROLLER+ WITH CHARGING SOCKETS

### 44 kW

Calibration law compliant, the eMC3 charging pole has two integrated Type 2 charging sockets. Thanks to its ability of charging two vehicles at the same, it is the ideal solution for public applications. In group installations, the controller charging pole takes care of all necessary communication functions with the Dashboard. The double powder-coated metal housing is splash and dust protected. Rain runs off the curved cover towards the back. The plinth is designed so that the eMC3 charging pole is easy to install on any surface and appears to float. Dashboard communication via OCPP can be integrated as an optional extra. The charging pole is equipped with two energy meters, overvoltage protection and two Type B residual current circuit breakers (RCCB).
