4	First aid measures (in case	e of electrolyte leakage from the battery)
	Eye contact :	Flush the eyes with plenty of clean water for at least 15 minutes immediately, without rubbing. Get immediate medical treatment. If appropriate procedures are not taken, this may cause eye injury.
	Skin contact :	Wash the affected area under tepid running water using a mild soap. If appropriates procedures are not taken, this may cause sores on the skin. Get medical attention if irritation develops or persists.
	Inhalation :	Remove to fresh air immediately. Get medical treatment immediately.
5	Firefighting measures	
		Alcohol-resistant foam and dry sand are effective.
		Be sure on the windward to extinguish the fire, since vapor may
		make eyes, nose and throat irritate, Wear the respiratory
		protection equipment in some cases.
6	Accidental release measures Take up with absorbent cloth Move the battery away from	
7	Handling and storage	
	Handling :	 ž When packing the batteries, do not allow battery terminals to contact each other, or contact with other metals. Be sure to pack batteries by providing partitions in the packaging box, or in a separate plastic bag so that the single batteries are not mixed together. ž Use strong material for packaging boxes so that they will not be damaged by vibration, impact, dropping and stacking during their transportation. ž Do not short-circuit, recharge, deform, throw into fire or disassemble. ž Do not mix different type of batteries. ž Do not solder directly onto batteries.
		ž Insert the battery correctly in electrical equipment.

Storage

- : ž Do not let water penetrate into packaging boxes during their storage and transportation.
 - ž Do not store the battery in places of the high temperature or under direct sunlight.
 - Please also avoid the places of high humidity. Be sure not to expose the battery to condensation, rain or frozen condition

Hand Protection	:	Safety gloves.
Eye Protection	:	Safety goggle

9. Physical and chemical properties

Appearance	:	Cylindrical shape
Nominal Voltage	:	3 V

10. Stability and reactivity

Since batteries utilize a chemical reaction they are actually considered a chemical product. As such, battery performance will deteriorate over time even if stored for a long period of time without being used. In addition, the various usage conditions such as discharge, ambient temperature, etc. are not maintained within the specified ranges the life expectancy of the battery may be shortened or the device in which the battery is used may be damaged by electrolyte leakage.

11. Toxicological information

Swallowing can lead to chemical bums, perforation of soft tissue, and death. Severe bums can occur within 2 hours of ingestion. Seek medical attention immediately

12. Ecological information

In case of the worn out battery was disposed in land, the battery case may be corroded, and leak electrolyte. However, there is no environmental impact information. Mercury (Hg), Cadmium (Cd) and Lead (Pb) are not used in cell.

13. Disposal considerations

When the battery is worn out, dispose of it under the ordinance of each local government.

14. Transport information

Handling

During the transportation of a large amount of batteries by ship, trailer or railway, do not leave them in the places of high temperatures and do not allow them to be exposed to condensation.

During the transportation do not allow packages to be dropped or damaged.
