

## PG TYPE CABLE STRIPPING TOOL

### LV AND MV CABLE OUTER SHEATH STRIPPER

#### KEY FEATURES

- Removal of PE and PVC outer cable sheath
- Light weight tool
- Easy handling
- Speed of cutting and removal of outer cable sheath
- Application for LV and MV
- Large range of cable diameters covered by the stripping tools

PG cable stripping tools are designed to strip PE and PVC cable outer sheaths from LV and MV cables in order to prepare the cable ready for the installation of cable joints, terminations or connectors.

The tool has a cable diameter capacity ranging between 8 to 75mm and cutting depth capacities varying from 0.9mm to 3.3mm depending of the stripping tool used.

The stripping tool enables the operator to make a circular cut first and followed by a longitudinal cut in the cable outer sheath, then the end blades are used to open and remove the cut piece of the cable outer sheath.

The tool can be used with one hand only to cut the cable outer sheath while the other hand can maintain the cable.

**Customers can count on consistent, high quality products, driven by TE's proven innovation and backed by our extraordinary customer support.**
